

Free Career Positioning Assessment

Free Career Positioning Assessment

Purpose: This is the lead-magnet survey referenced on the website plan ("Take the Free Career Assessment"). It should take 4-6 minutes to complete, feel personal rather than generic, and end with a lead capture + personalized result that naturally points toward a free strategy call.

Format recommendation: Build this in a tool like Typeform, Tally, or a custom on-site quiz component — something that shows one question at a time and feels conversational, not like a static form. Progress bar strongly recommended (completion rates drop fast without one).

Structure Overview

- 18 questions total across 6 categories (3 each), mapping to your core pillars
 - Mix of scaled (1-5) and multiple-choice questions
 - Lead capture (name + email) placed **after** question 1 or 2, not at the very end — once someone starts answering, or right before revealing results (test both; capturing early increases lead count but can lower completion)
 - Results delivered as a score + tier + 2-3 personalized action tips

Scoring Methodology

Assign point values as follows: - **1-5 scale questions:** use raw value (1-5 points) - **4-option multiple choice:** A = 1, B = 2, C = 3, D = 4 (adjust order per question so “healthiest” answer = 4) - **Frequency questions (Q10, Q15):** 0 = 1pt, 1-2 = 2pt, 3-5 = 3pt, 6+ = 4pt

Category score = sum of that section’s 3 questions (max 12 per category, 6 categories = max 72 total)

Overall tiers: - 0-30 points: “Search Reset Needed” - 31-50 points: “Building Momentum” - 51-72 points: “Market Ready”

Optionally, also surface each candidate’s **lowest-scoring category** by name (e.g., “Your biggest opportunity right now: Networking”) — this personalization is what makes the free result feel valuable rather than generic, and it naturally sets up the specific service tier to recommend on the follow-up call.

Results Page Copy (by tier)

Tier 1: “Search Reset Needed” (0-30 pts)

Headline: Your search has real potential — it just needs a stronger foundation.

Your results show some clear opportunities to strengthen your brand, positioning, and search strategy before you keep spending energy applying. The good news: every one of these is fixable, and most candidates in this range see a real shift within a few weeks of focused work.

Tier 2: “Building Momentum” (31-50 pts)

Headline: You’re on the right track — a few targeted fixes will accelerate things fast.

You've got real strengths to work with, but there are a few specific gaps holding back your results — likely in [lowest-scoring category]. Closing these gaps is usually where we see the biggest jump in interview activity.

CTA: Book your free strategy call to pinpoint your gaps →

Tier 3: “Market Ready” (51-72 pts)

Headline: You're close. Let's make sure you land the *right* offer — not just an offer.

You're already doing a lot right. At this stage, the biggest lever left is usually negotiation and market positioning — making sure you're not leaving money or the ideal role on the table.

Notes for Implementation

- Keep the actual quiz UI light — one question per screen, progress bar visible, no long instructional text
- Track completion rate by question to spot drop-off points once live
- This tool doubles as a strong SEO asset — target the page for terms like “free career assessment,” “job search readiness quiz,” “am I ready for a job search”
- Consider gating the *detailed* per-category breakdown behind the strategy call booking (tease the overall tier for free, save full detail as the “hook” for the call) — worth testing both approaches
